

# Wallingford School GCSE Examination Results (Update Jan 2018)

This was the first year of the reformed GCSEs and the new '1-9' grades. Although there are obvious comparisons to be drawn between the new set of headline figures and past performance, the nature of the reforms makes it more difficult to compare like for like. You could say this is year 'zero' and therefore every school has had its best results ever!

Our performance in English and Maths has been particularly strong in recent years – among the very best around. This year was no exception, with students making excellent progress across the attainment range. We are particularly proud of the number of students who secured the pass grades of 4 and 5; results that put us firmly in the top 10% of the country for progress.

The majority of other subjects also produced results of an extremely high standard: top 20% for progress at both the A\*-C and A\*-A thresholds.

The table below shows an updated version of our 2017 Y11 results. The following page shows the past two years and a link to the official DfE performance tables.

The 'Progress Rank' indicates how our students compare to those nationally on progress. 'Top 10%' here would show, for that particular measure, that our students have made the same amount of progress as schools in the top 10% of the country.

NB: National results for the 'English (Best of Language and Literature)' measure are not published.

## 2017 Results

Measure	Wallingford School	National Average	Progress Rank	
<b>Attainment 8</b>	51 points	44 points	-	
<b>Progress 8</b>	0.36 'Across 8 subjects: on average, students achieve over a third of grade higher than the national average'
